Rept- A-83, 1962.

DESCRIPTORS: *Plasma physics, Magnetic fields,
Particles, Electrons, Ions, Oscillation, Theory.

A theory is described for the transfer phenomena in a
plasma across a constant magnetic field. An important
new moment is the calculation of the interaction of
plasma particles with longitudinal oscillation. It is
shown that with fairly large ratios of the electron and
ion temperatures, the effect of the particle interaction
with the plasma oscillations leads to a substantial
